Card A

Twelve businesses near score 58

Each row lists one business on each side. Compare **mean annual waste management cost 12 months after GreenWaste**, in AED per business.

Score at or below 58	Cost AED	Score above 58	Cost AED
57.7	170	58.4	2,410
57.3	1,260	58.1	1,950
57.1	1,410	58.1	1,000
57.7	640	58.7	2,070
57.5	1,370	58.9	1,640
57.1	950	58.3	1,920

Six city records from the GreenWaste data per side, independently sampled for this card. Costs rounded to ten AED; scores displayed to one decimal. Each business is placed on its side using its exact score, so a score above the cut-off can display as 58.0.

Find each side's mean, then subtract **at/below minus above**.

Mean at/below: _____ AED. Mean above: _____ AED.

Raw gap: _____ AED. Put your letter and gap on a sticky note.

This small raw gap is not the fitted cut-off jump or an established effect. Record your work on worksheet Q1, page 3.

GreenWaste is a fictional training case.

Card B

Twelve businesses near score 58

Each row lists one business on each side. Compare **mean annual waste management cost 12 months after GreenWaste**, in AED per business.

Score at or below 58	Cost AED	Score above 58	Cost AED
57.1	1,850	58.8	1,480
57.3	1,650	58.6	2,900
57.9	2,180	58.4	3,120
58.0	900	58.4	1,490
57.8	1,360	58.9	1,760
57.5	1,160	58.6	2,880

Six city records from the GreenWaste data per side, independently sampled for this card. Costs rounded to ten AED; scores displayed to one decimal. Each business is placed on its side using its exact score, so a score above the cut-off can display as 58.0.

Find each side's mean, then subtract **at/below minus above**.

Mean at/below: _____ AED. Mean above: _____ AED.

Raw gap: _____ AED. Put your letter and gap on a sticky note.

This small raw gap is not the fitted cut-off jump or an established effect. Record your work on worksheet Q1, page 3.

Card C

Twelve businesses near score 58

Each row lists one business on each side. Compare **mean annual waste management cost 12 months after GreenWaste**, in AED per business.

Score at or below 58	Cost AED	Score above 58	Cost AED
58.0	1,430	58.1	1,410
57.1	350	58.8	2,640
57.1	2,680	58.3	2,430
57.1	1,410	58.8	3,270
57.5	520	58.7	3,620
57.7	2,240	58.8	1,610

Six city records from the GreenWaste data per side, independently sampled for this card. Costs rounded to ten AED; scores displayed to one decimal. Each business is placed on its side using its exact score, so a score above the cut-off can display as 58.0.

Find each side's mean, then subtract **at/below minus above**.

Mean at/below: _____ AED. Mean above: _____ AED.

Raw gap: _____ AED. Put your letter and gap on a sticky note.

This small raw gap is not the fitted cut-off jump or an established effect. Record your work on worksheet Q1, page 3.

Card D

Twelve businesses near score 58

Each row lists one business on each side. Compare **mean annual waste management cost 12 months after GreenWaste**, in AED per business.

Score at or below 58	Cost AED	Score above 58	Cost AED
57.4	2,100	58.2	2,230
57.2	800	58.1	1,480
57.9	1,010	58.7	1,490
58.0	670	58.4	1,810
57.4	450	58.1	2,590
57.1	880	58.7	2,040

Six city records from the GreenWaste data per side, independently sampled for this card. Costs rounded to ten AED; scores displayed to one decimal. Each business is placed on its side using its exact score, so a score above the cut-off can display as 58.0.

Find each side's mean, then subtract **at/below minus above**.

Mean at/below: _____ AED. Mean above: _____ AED.

Raw gap: _____ AED. Put your letter and gap on a sticky note.

This small raw gap is not the fitted cut-off jump or an established effect. Record your work on worksheet Q1, page 3.

Card E

Twelve businesses near score 58

Each row lists one business on each side. Compare **mean annual waste management cost 12 months after GreenWaste**, in AED per business.

Score at or below 58	Cost AED	Score above 58	Cost AED
57.6	820	58.7	3,920
57.8	1,590	58.1	1,950
57.1	880	58.8	2,190
57.5	110	58.3	1,870
57.1	1,410	58.7	3,620
57.9	930	58.9	1,940

Six city records from the GreenWaste data per side, independently sampled for this card. Costs rounded to ten AED; scores displayed to one decimal. Each business is placed on its side using its exact score, so a score above the cut-off can display as 58.0.

Find each side's mean, then subtract **at/below minus above**.

Mean at/below: _____ AED. Mean above: _____ AED.

Raw gap: _____ AED. Put your letter and gap on a sticky note.

This small raw gap is not the fitted cut-off jump or an established effect. Record your work on worksheet Q1, page 3.

Card F

Twelve businesses near score 58

Each row lists one business on each side. Compare **mean annual waste management cost 12 months after GreenWaste**, in AED per business.

Score at or below 58	Cost AED	Score above 58	Cost AED
57.1	930	58.7	1,490
57.1	1,410	58.9	1,300
58.0	1,840	59.0	2,020
58.0	1,430	58.7	2,200
57.1	1,500	58.7	2,070
57.7	1,520	58.8	1,480

Six city records from the GreenWaste data per side, independently sampled for this card. Costs rounded to ten AED; scores displayed to one decimal. Each business is placed on its side using its exact score, so a score above the cut-off can display as 58.0.

Find each side's mean, then subtract **at/below minus above**.

Mean at/below: _____ AED. Mean above: _____ AED.

Raw gap: _____ AED. Put your letter and gap on a sticky note.

This small raw gap is not the fitted cut-off jump or an established effect. Record your work on worksheet Q1, page 3.

Card G

Twelve businesses near score 58

Each row lists one business on each side. Compare **mean annual waste management cost 12 months after GreenWaste**, in AED per business.

Score at or below 58	Cost AED	Score above 58	Cost AED
57.9	1,340	58.1	1,480
57.7	200	58.1	2,590
58.0	900	58.8	3,260
57.4	1,370	59.0	3,100
57.8	1,220	58.7	2,140
57.6	820	58.5	1,310

Six city records from the GreenWaste data per side, independently sampled for this card. Costs rounded to ten AED; scores displayed to one decimal. Each business is placed on its side using its exact score, so a score above the cut-off can display as 58.0.

Find each side's mean, then subtract **at/below minus above**.

Mean at/below: _____ AED. Mean above: _____ AED.

Raw gap: _____ AED. Put your letter and gap on a sticky note.

This small raw gap is not the fitted cut-off jump or an established effect. Record your work on worksheet Q1, page 3.

Card H

Twelve businesses near score 58

Each row lists one business on each side. Compare **mean annual waste management cost 12 months after GreenWaste**, in AED per business.

Score at or below 58	Cost AED	Score above 58	Cost AED
57.1	2,310	58.7	2,060
57.3	1,560	58.7	870
58.0	2,540	58.7	1,870
57.1	1,820	58.5	1,640
57.7	640	58.6	1,560
57.5	1,270	58.3	620

Six city records from the GreenWaste data per side, independently sampled for this card. Costs rounded to ten AED; scores displayed to one decimal. Each business is placed on its side using its exact score, so a score above the cut-off can display as 58.0.

Find each side's mean, then subtract **at/below minus above**.

Mean at/below: _____ AED. Mean above: _____ AED.

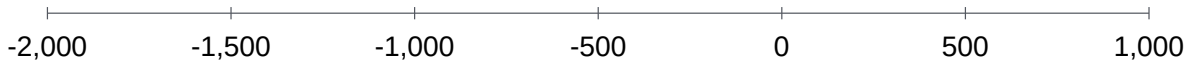

Raw gap: _____ AED. Put your letter and gap on a sticky note.

This small raw gap is not the fitted cut-off jump or an established effect. Record your work on worksheet Q1, page 3.

Place raw gaps. Compare the fitted jump.

Use the upper lane for A-H sticky notes and the lower lane for the fitted result. Keep the comparison questions distinct.

Raw gaps: six businesses per side

Fitted local jump: 545 businesses, separate slopes

At/below minus above (AED); negative means lower costs

Why do raw card gaps vary? Why is the fitted jump a different comparison?

Print this blank A4 backup or use the existing A1 poster. Negative below-minus-above values mean lower costs; this is not the positive-saving scale. The line covers -2,000 to +1,000 AED.
